Winter Egg Production Good at 35 Below Zero

R. G. Newton, Superintendent, Experimental Station, Windermere, B.C., sends the following timely article on production of eggs in winter:

A flock consisting of 104 White Leghorns and 84 R. I. Reds, or a total of 188 birds at the Dominion Experimental Station, Windermere, produced from October 9, when they were placed in laying houses, up to the end of February, 10,362 eggs, or is interesting to note that 48 of these birds averaged 106 eggs and 89 birds averaged 90 eggs. While there is nothing spectacular in these results, Windermere where temperatures down to 35 degrees below zero were recorded. No heat nor artificial lighting were used.

The main considerations in obtaining winter eggs are good, well developed birds, suitable feeds, proper housing and sanitation, and the personal factor.

In feeding, the scratch feed used consists of wheat, 3 parts corn, 1 part, oats 2 parts, barley 2 parts. The mash which is kept before the birds at all times, consists of a mixture made up of cornmeal 175 pounds, shorts 75, middlings 75, oat chop 50, barley chop 50, meat scrap 45, fish meal 45, bone meal 18, linseed meal 6, salt 6 and cod liver oil 6.

The birds were housed in what is known as The Farmer's House, with straw loft and the front one-third wood, one-third glass and one-third open or cotton front.

Ford Re-opens

Alberta Offices
CALGARY, Sept. 30.—Sales office of the Ford Motor Company of Canada will be re-opened here October 1, it was announced. The office will supervise sales and service in Alberta. Regina office will also be re-opened, it was said, and will be under supervision of the Winnipeg office along with Calgary. Direct Alberta contact of the company was severed last March when the assembly plant here was closed.

Heard at the poker party: "Does your wife enjoy good health?" "No, it's bad health she enjoys the most. She never gets through talking about her ailments."

Senor de la Cierva Hopes to To Make Air Travel General

Giving real wings to the automobile is the problem to which the inventor of the windmill airplane has recently been applying himself. Senor de la Cierva is giving effect to an idea that it may be possible to build a flying motor car which could be housed in an ordinary garage, driven along the roads to a suitable point and then take the air and fly across country at 100 miles an hour. In the autogiro, the inventor already has a motor which operates the propeller for driving the machine through the air and also drives the rotating wings which lift the machine from the ground. He now plans to connect this engine to the wheels of the under-carriage enabling the autogiro with wings folded to be driven along the ground.

KINSELLA KERNELS

Kinsella, Oct. 3.—Messrs. E. C. Williams and R. Cormack spent a day in Edmonton last week.

Mr. B. Wachter spent Sunday at his home here.

Miss Maxine Wachter is spending some time in Edmonton.

Mrs. B. W. Richardson of Viking, spent last Friday with Mrs. R. L. Eaton.

The Ladies' Aid will meet at the home of Mrs. Carl Smogard on Thursday afternoon, October 12th.

The chicken supper will be held in the basement of the United Church on Friday evening, October 20th. Adults 35c; children 20c.

Mrs. Johnnie Beschell entertained in honor of her sister-in-law, a bride of the near future on Wednesday afternoon last.

Mr. J. L. Scott is loading a car of grain.

Threshing and hauling grain is the order of the day now.

Mr. and Mrs. R. Cormack and daughter, Ella, spent last Sunday with Mr. and Mrs. E. C. Williams.

Mrs. Haburger and son spent the week at their home in Edmonton.

Thanksgiving service will be held in the United Church on Sunday morning at 11 a.m. Rev. Griffith is the pastor.

Mrs. and Mrs. Carl Smogard spent the week end in Edmonton.

Review of Western Markets

Cattle
BEEF—Receipts at Edmonton lighter this week and trade brisker. Good quality handweights sold steady; heavy common kinds hard to move at market quotations. Choice heavy steers \$2.50@2.75; medium \$2.20@2.30; common \$1.25@1.75. Choice heifers \$2.50@3; good \$1.25@1.50; medium \$1@1.25; common 75c@81c; canners and cutters at 50c@75c. Choice bulls made \$1.15@1.25; medium \$1@1.15; canners from 50c up. Choice light calves \$3.50@4; common \$1.50@3. FEEDERS-STOCK-ERS—Feeder steers \$1.40@3; stock steers \$1.25@2.50; stock heifers from \$1.25@2; stock cows 75c@1.25.

Hogs
Edmonton hogs show steady. Bacons quoted \$5.75; select \$6.25; butchers \$5.25, fed and watered basis.

Sheep
Edmonton prices steady. Yearlings bringing from \$1.50@2.75; ewes \$1@2; lambs \$2@4.

Cream
CREAM—Quotations unchanged. Special 12c; first, 10c; second, 7c; at country points, and 2c, higher with delivery.

Homesteads for Dry Area Farmers

Through the provincial lands and mines department, a special area of homesteaded lands in Northern Alberta, south-west of the Little Smoky River south of Falher, along the Northern Alberta Railway, has been set aside for settlement by farmers from the drought areas in south-eastern Alberta. Special regulations have been prepared under which settlement of the new area will be carried out. The transfer of settlers will be undertaken through the provincial department of agriculture.

Under the re-settlement policy, some 190 families have been, since middle summer, removed from the dry area to various parts in Northern Alberta, and it is expected that the movement may total 400 families.

Resignation of Public Works Minister Asked

Calgary, Sept. 25.—A resolution asking the resignation of Hon. O. L. McPherson, minister of Public Works in the Alberta government, as a result of the nullity action brought against him by his first wife, has been passed by the executive of the southern Alberta branch of the Dominion Social Service Council, it was learned here today.

The resolution states that during the trial there was "brought to view a shameless disregard, on his part, of the canons of common morality." It declares "some conformity to Christian standards should rightly be required of our public men." The executive asks his resignation "as it is felt that his retention of office is detrimental to the moral interests of the people of this province."

Winners of Special Awards In School Fair Announced

Finch special, 4 prizes, \$3.00, best article made of wood—1st, Arthur Peterson, Irma, \$1.25; 2nd, John Solguski, Albert, \$1.00; 3rd, Don Moore, Batts, 50c; 4th, Gordon Whiddon, Batts, 25c.

T. Eaton Co., for most points in vegetables and sheaf of grain, \$4.00—1st, Connie Burton, Alma Mater, \$1.75, 14 points; 2nd, Art Peterson, \$1.25, 12 points; 3rd, Jean Whiddon, Batts, Donald Burton, Alma Mater, (tied) 50c each.

Foxwell & Johnson for most points in stock and poultry \$3.00—1st, Jean Whiddon, Batts, \$1.50; 2nd, Catherine Paterson, Educational Point, \$1.00; 3rd, Donald Moore, Batts, 50c.

Wm. Matthews, \$5.00, for scholars winning most points—1st, Evelyn McRoberts, 67 points, \$3.00; 2nd, Edith Jones, Batts, 55, \$2.00; Miss Jones just beat Don Moore Batts, by one point for second place.

Magic Baking Powder (11 entries) Camera, Betty McLean, Educational Point, 1st, fountain pen to Jean Whiddon, Batts, 2nd.

The Blue Ribbon tea biscuit contest was won by two pair of sisters, \$5.00: Ethel Tate, 2nd, \$2.00; Jacqueline Tate, 2nd, \$1.50; Edith McRoberts, 3rd, \$1.00; Evelyn McRoberts, 4th, 50c.

Dr. Greenberg's special drew 12 entrants—Best bouquet home grown flowers, \$4.00: Arthur Peterson, 1st, \$2.00; Margaret Tate, 2nd, \$1.50; Mildred King, 3rd, \$1.00; Alma Mater, Mary Currie, Alberta, 4th, 75c; Carl Gulbraa, 5th, 50c; H. Gulbraa, 6th, 25c.

The scholar having highest number of points is Evelyn McRoberts, Albert, 67; Donald Moore, Batts, 54, for boys. They win scholarship.

centralizers. Deliveries show steady decline.

Poultry—Eggs
POULTRY—Fowl, No. 1, over 4 lbs, 66¢; No. 1, under 4 lbs, 6c; No. 2, 36¢; No. 3, 34¢; No. 4, 32¢; No. 5, 30¢; No. 1, light, 7¢; No. 2, 6¢; No. 3, 5¢; No. 4, 4¢; No. 5, 3¢. EGGS—Market made further advance this week, prices gaining 2¢; Extras now 17c; firsts, 14c; seconds, 8c. Receipts very limited and good demand. Short held eggs cleaned up and some storage stocks being withdrawn. Few pullets arriving, but size still small.

Hay—Feed Oats—Greenfeed
HAY—Carload lot trails slow. Growers are busy haling and threshing, while buyers are scarce. Prices steady: Upland, \$7; timothy, \$7@8, on track at shipping point. Calgary loose hay market finds demand good, but supplies limited. Upland, baled, \$10@11; loose, \$10 per ton, delivered. FEED OATS—Quotations slightly easier this week at \$23@25c per bushel, delivered. Fair trade at cash values. GREENFEED—Price steadily moving up, being now \$3@3.50 per ton, delivered. Ready outlet for all supplies, while grade is good.

SPORT PEEPS

Back in the summer the sport writers took a straw vote on the baseball outcome in the Major Leagues. What's laugh we get now when we see that not one vote was cast for the Giants winning the pennant. Out of 176 writers, not a single person considered the Terry bunch had the punch to win out. No wonder there is such rejoicing in it.

The world series sees two teams that have no superman in their lineup. There is no Babe Ruth to win the game single-handed. The result will be dependent upon group work rather than upon a Goliath who takes all the glory. The public will miss these super-swatters and the excitement they create when they step up to the plate. But the games are probably all the better for their absence.

Lou Gehrig holds the third place in the home-run standing of the big leagues. The other day he got himself a wife and the plan was to announce the fact when he hit another homer. But a wife and a home and a homer was just not to be on the same day.

The conjurer was announcing his act, "I have had letters of appreciation from Ireland, England and Wales, and a postcard from Scotland."

The opening of the world series provided a lot of thrills. Behind the great pitcher of Carl Hubbell, the New York Giants provided such that the score of 4 to 2 against the Washington Senators was what the experts predicted. Our guess was for the Giants, so probably they will class us in that select bunch of "predictors." Now that is nice.

Marvin Nelson, who, in 1930 and 1932, won the long swim at Toronto, came in ahead 1 mile Chicago 15-mile contest. Through the cold waters of Lake Michigan he wormed his way like a seal, negotiating the distance in the remarkable time of 7 hours and 22 minutes and 25 seconds, a world's record for the distance.

In the final game of the season between the Yankees and Boston, Babe Ruth took the mound and pitched his team to victory. At the same time he drove out his 34th homer of the season. No question about it, he thus holds the pitching record, with 100 per cent wins and no defeats. Babe is a wonder.

It was very interesting to read the sport writers comparison of qualities of the two great teams now in the world series. And as we watch the game we see the men with super-qualities look like juniors. Down they tumble while the man they failed to mention takes most of the honors. The radio brings the game to us in a most realistic form.

CARD OF THANKS

A complete statement of the school fair can not be given at this time as some of the receipts have not yet come in. The management wish to publicly thank all who helped in one way or other to make our fair a success. The women's Institute for their good booth services and contribution, and the lumber yard for use of lumber especially, and the judges are not forgotten. A financial statement will follow soon.

Leaving Strips of Stubble To Check Soil Drifting

In regions where strip farming is not essential to control soil drifting certain modifications of this practice may nevertheless be advisable. With a view to controlling water more than wind erosion the superintendent of the Dominion experimental substation at Beaverlodge, Alberta, has adopted the practice of leaving rod-side strips of unploughed stubble at intervals throughout his fall-ploughed fields. The stubble arrests water flow and spreads the silt being carried down hill. It likewise tends to check incipient soil drifting, says W.D. Wright, Superintendent, Dominion Experimental Substation, Beaverlodge, Alberta.

Continuing on the subject he declares: "The erosive action of either wind or water seems to be increased by the amount of grit that is carried, and anything which catches the silt before any considerable volume of it can be lifted tends to arrest the process."

If time presses in the spring the unploughed strips may, if necessary, be surface-cultivated or drilled without tillage, though the aim is to spring-plough these strips.

Make Cold Frame In the Autumn

Autumn is the best time for the amateur gardener to erect a cold frame. A cold frame is much like a hothed in appearance, but without manure. It is used in the spring either for seeds or for growing plants taken from the hothed before they can be set out in the open, or it may also be used by flower-lovers who start plants in the house and who cannot get or do not desire to use manure.

According to the directions of the circular of the Dominion department of agriculture on how to make and use hotheds and cold frames, the frame should be made with sides and ends of 12-inch boards, preferably two inches thick and placed on a slope so that the back part of the frame is six inches higher than the front. By getting the cold frame ready before the winter sets in, considerable time will be saved in the early spring when it would be impossible to erect the frame owing to the frost in the ground.

Business Better

Moncton, N.B., October 6.—Conditions in the steel and coal trade look very promising at the present time, stated S. Newton J. Moore, president of the Dominion Steel and Coal Company, who passed through Moncton on the Ocean Limited of the Canadian National Railway, recently enroute from Montreal to Sydney, N.S.

Speaking with regard to business conditions as affecting Canada and other parts of the world, he stated that there has undoubtedly been an improvement, particularly in Great Britain, which seems to be the country making the greatest progress towards economic recovery. Sir Newton Moore just recently returned from the Old Country.

Stuart Fenton Meets With Near-Fatal Accident on Thursday, September 28

Mr. Stuart Fenton met with a bad accident on Thursday, September 28, which might easily have been fatal. While coming to Irma with a truck loaded with wheat, he overtook Mr. S. Congdon, about 2 1/2 miles east of Irma on the highway. Mr. Congdon was driving a team of horses, pulling two stock wagons and apparently did not hear the sound of the horn of the truck. Stuart, in trying to pass the wagons on the narrow strip of road led to him, got in the ditch with the consequence that the load was upset, spilling the wheat. Stuart badly wrecking the cab, the driver narrowly escaping from being killed.

Hear Philco Radio at Its Best at Irma Trading Co.

Of all entertainment people enjoy in winter, radio stands out pre-eminent. But like the outstanding makes of phonographs of yesterday, there are today outstanding makes of radios and Philco undoubtedly comes well within this class.

Canadians are satisfied it is the outstanding radio at the price today and have established it as such.

No doubt many Irma town and district family with gather 'round the home fires this winter during the long evenings and enjoy world programs over the ether. In some instances, the occasional home will vote for a change to better radio reception. When this is noted, you must consider Philco seriously—better still, hear this remarkable radio in all its glory at the Irma Trading Co. store. The management of this enterprising firm cordially invite one and all to enjoy a program or two. A fresh stock of batteries for all makes of radios and circuits are available at this store. In fact, "anything in radio."

Land Sale October 11th To Make History

A tract of 13-4 square miles southwest of Edson is being offered for sale by the department of lands and mines, and tenders will be received until October 11. The significance of the announcement is that this is the first timber berth in the province to be put up for outright sale, including land as well as right to cut timber, since the transfer of Alberta's natural resources.

U.F.A. and C.C.F. Same

Macleod, Sept. 28.—United Farmers of Alberta and Co-operative Commonwealth Federation are practically one, Norman F. Priestley, vice-president of the C.C.F. intimated in addressing a U.F.A. rally here.

Mr. Priestley declared the C.C.F. would eventually overcome the problems of the depression. Faith in the U.F.A. is necessary to the success of the program, he added, and urged attendance at personal endeavor or in the payment of dues.

Open Season for Ruffed Grouse

Close season on ruffed grouse has ended for the time being, and shooting of these will be permitted between October 1st and 15th, north of the Coronation line of the C.P.R. and North of the Red Deer River west of a point near Nevias.

UNITED CHURCH NOTES

Next Sunday, Thanksgiving services will be held at Albert, Alma Mater and town. The theme of the sermon will be "The Sin of Ingratitude."

The members of the board are asked to meet after the close of the evening service in town.

The young people interested in Y. P.S. are asked to meet on Sunday, October 15th, after the evening service.

HOG SHIPMENTS

Having set a special shipping day for hogs, it enables us to pay the highest market prices.

NEXT SHIPPING DAY: WEDNESDAY

OCTOBER 18th.

Please have hogs in not later than 2.30 on day of shipment.

Men Make The State

Picking up a copy of the Moose Jaw Times the other day, the writer's attention was drawn to an article entitled "Men Make Cities" which opened by quoting the following inspirational lines of an unknown poet taken from the September issue of The Rotarian:

Cities are what men make them,
What men demand they shall be;
Slothful, sloven, and sleeping,
Progressive, beautiful, free.
If the hearts of the builders are noble,
In one with the day and the need,
They will build into grandeur and greatness,
For so it was decreed.

These lines, it is stated, were inspired by the achievement of Atchison, Kansas, as told by Ed. W. Howe, editor of the Atchison Daily Globe. Atchison is one of the smaller cities, but in twelve years it has evolved from a bankrupt, tax-broke city—"slothful, sloven and sleeping"—into one that is "progressive, beautiful, free," with its bonded debt cut 70 per cent, and even while this fine record was being made its tax rate was reduced by 35 per cent.

"How was it done? In 1920 a group of citizens, noting the seriousness of the situation, started a movement to save the city, a new idea took hold of the administration, expenses were cut, and plans formulated to enable the taxpayers to handle the load and reduce the bonded debt and the overhead, and the creditable record was not interrupted through three years of the hardest times ever known, largely because lost courage and confidence was restored.

The Rotarian magazine tells the story in an editorial challenge to Rotarians in every city to be up and doing for the welfare of their home town—to study its problems and to act. The Moose Jaw Times applies it directly to its own city and declares the challenge comes at this time not only to Rotarians but to every member of every service club of Moose Jaw. The writer of this column in passing the story along would make bold to still further enlarge the field of its application from city or town to the citizenship of every community, large or small, because it is just as true that men—and women—make rural communities and little villages as it is that they make cities. It is also true that in these days our rural communities, hamlets and villages are confronted with problems, which, considering their population and resources, are as heavy and serious as those of the larger cities—perhaps even more so.

Furthermore, because of the very nature and extent of the world-wide depression which has developed, all communities, large and small, find themselves much in the same position. One cannot in their emergency turn to another because all are adversely affected, and while the willingness to assist may be there the ability to do so is lacking. So communities are thrown back on their resources to a greater extent than formerly.

Again, this has resulted in much purely voluntary work by individuals and organizations being restricted, leading to both individuals and communities turning to and relying upon the State to take over and assume their problems. The net result is a weakening of the morale of the individual, a loss of courage and confidence, the development of habits of slothfulness, and a deterioration of initiative and enterprise. Instead of men adhering to the truth that they make cities and nations, thousands are adopting the false theory that cities and nations make men, and that, instead of it being the duty and responsibility of men to order their lives and make their communities, it is the duty and responsibility of the State to order the lives and control the actions and destinies of the individual, thus reversing the order of the citizens controlling and directing the State.

Observant men and women are more and more coming to the view that the time has arrived to call a halt to this increasing reliance upon the State, and to renewed belief in the truth that, like the citizens of Atchison, Kansas, they must save themselves and their city by action on their own part; that, instead of allowing their difficulties and problems to swamp and overcome them, they must overcome their problems and surmount their difficulties. It can be done. It has been done times without number by individuals and communities in the past.

Indeed, if it is not done both the individual and the community, large or small, faces ultimate disaster. The individual will find himself submerged and his individuality largely gone, while the community will end up in complete bankruptcy and the loss of its local freedom and autonomy.

On the other hand, if the men—and women—of a community, be it a small village or a large city, bestir themselves, face and study their problems, and proceed to grapple with them one by one, they will be surprised how much they can accomplish. It will mean the abandonment of existing policies of drifting with the adverse tides. It will mean the lifting off of this expenditure and that; it will mean the application of the most rigid economy in all public administration; it will involve a more active participation by the individual citizen in effecting community savings; it will necessitate community sacrifices for a time just as thousands of individuals have had to make individual sacrifices. But it will mean ultimate success both for the community and the individuals who constitute and make the community.

In a word, it means a return to the proper and sound conception—that men make cities, not cities make men. And in using the term cities the application is to all organized communities whether rural or urban, large or small.

Dairy For Prince Albert

Believing Prince Albert is headed for better times, F. R. Glaze, of Kerrobert, announced his plans to establish a dairy there for the retail distribution of pasteurized milk and cream. He has acquired 1,300 acres near the city and built a barn to house 40 Holstein cattle he intends to bring from Kerrobert, where he now operates a dairy.

Opossums are becoming so numerous in New Zealand that they are a menace.

Bath Tubs From England

Most of the imported baths and bath tubs which are used in Canada come from the United Kingdom. During the past 12 months the value of these was \$101,000, compared with \$24,000 from the United States, according to an Ottawa bulletin. The importation of the latter was less than half that of the previous 12 months.

Chicago school teachers can't see that a century of progress has done much or them.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry. It has been on the market for the past 88 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

British Railway Regulation

No-Smoking Order in Compartments To Be Enforced

In future all passenger coaches on the London, Midland and Scottish Railway will bear a distinctive label, "smoking" or "non-smoking." About 10,000 vehicles, with a seating capacity of more than 1,000,000 will have to be dealt with. Probably a year will elapse before the change-over is complete.

"We have had many complaints," said an official, "about people smoking in non-smoking compartments. They take the view that as smoking is not definitely forbidden they may smoke if they wish to do so. When the new labels are affixed on one will be allowed to smoke in a non-smoking compartment, even if other passengers say they have no objection. Smoking is allowed in 75 per cent. of the coaches and it is not proposed to alter that proportion."

Other railway lines in the United Kingdom have carriages labelled in various ways, meant to indicate they are either for smokers or non-smokers.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, "was persuaded to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. Now I know that Kruschen Salts are different. In three weeks I lost 5 lbs., and I felt five years younger. I really must say I feel a different woman. I have now lost 28 lbs. to date."

If you are overweight take one half-teaspoonful of Kruschen Salts in a glass of hot water before breakfast every morning. There will be no rapid or alarming loss of weight, but just a steady decrease of that flabby fat which is as unhealthy as it is unsightly. Kruschen is a scientific blend of minerals found in the waters of those European spas that have been used by generations of over stout people to reduce weight.

Rising Tide Of Fascism

Warning Is Sound by Secretary Of Workers' League

Warning against the "rising tide of Fascism," as exemplified by the Blue Shirts of Canada, was sounded by J. C. Wilson, of Winnipeg, National Secretary of the Workers' League, at an open-meeting of returned soldiers at Windsor, Ont.

"I understand the slogan of the Blue Shirts is 'Join us and get a job,' but that does not amount to a hill of beans," Mr. Wilson said. "In Winnipeg we formed the Old Contemplatives and had the same slogan. The only job offered us was police duty during trouble, a job now filled by 62 members of the Canadian Legion."

"There is no job for them except as storm troops for a Fascist government. That is their role, the same role as Fascists in Vancouver, strong-arm squad of Winnipeg, and Steel Helmets of Montreal."

"The time has come when you, as your economic needs, as the only effusions, must unite and fight for your economic needs as the only effective weapon to combat the rising tide of Fascism and possible war in six months."

Pains After Eating? Try This!

Pains after eating are generally due to an excess of acid in the stomach that ferments gas and causes belching, heart burn, bloating, sour stomach and indigestion. Bismarck Magnesia taken after meals will give such quick and pleasing relief you will be surprised. Any druggist will tell you ordinary Bismarck Magnesia is fine for sour acid stomach conditions. It should be in every home. It works.

Tomb Of Viking Chieftain

Discover Grave Of Warrior Buried 1,000 Years Ago

The tomb of a Viking chieftain, buried more than 1,000 years ago, was recently found at Laangtorra in central Sweden. The find clearly showed the warrior was of high rank and furnished an interesting example of the burying customs of his day. He had been interred with full armor and with a sword, evidently made in the south of England.

The sword hilt was decorated with silver ornaments, on one of which some magic runes had been engraved.

Claims Fast 'Plane

That the "plane" is faster than any other passenger-carrying type is the claim of the inventor of a new machine in Italy, having the body in a cylindrical enclosure, through which currents of air pass to supply the propelling power.

Scotland's potato crop this year was so large that the digging gave work to hundreds of unemployed.

Powerful Flashlight FREE for POKER HANDS!

ONLY Four complete sets of poker hands will secure you this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for Turret Poker Hands.

Sun ripened mellowness... extra satisfying flavour. That's the Quality you want in cigarette tobacco and that's the Quality you get in every package of Turret Fine Cut. And there's genuine economy too. You can roll at least 50 cigarettes from a 20¢ package.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO SAVE THE POKER HANDS

Had Wet Landing

Passenger On Amphibian Plane Stepped Out Into Water

The pilot of a big amphibian plane coming toward New York one night recently found himself in a nice fog which he thought would be pretty pure later. According to instructions, he landed at an outlying city and suggested that his passengers continue by rail. They all did, except one gentleman who said he was in a mighty hurry and would take a chance if the plane was going on. The pilot was going on, and let him stay. The fog got worse, but the passenger was untroubled. Two or three times the pilot and co-pilot looked back and found him deep in a magazine. He read right on until the plane had come down and stopped. Then, to the pilot's and the co-pilot's horror, he took up his suitcase, opened the door, and jumped nimbly out. It would have been all right but for the fact that, in view of the weather, the pilot had brought the amphibian down on the water instead of the field. They fished the gentleman out and dried him off and he hurried to town—New Yorker.

Trying Something New

Rolling Across Atlantic In "Gyroboat" Is Plan Of Two-Italians

Two Italians may attempt to cross the Atlantic in a barrel-like craft propelled solely by ball. They are Captain M. Caminito and his mechanic, Signor Rametta. The vessel, called "Gyroboat," is a kind of buoy in the shape of a barrel with a revolving cable which gives it its speed. It is completely closed and will hold several people. According to word from Palermo the inventors completed their first trial by crossing the Straits of Messina in less than an hour. They made their "ship" roll simply by their own movements inside the barrel. The inventors intend to propel their vessel down the coast to Catania and there to stay while they perfect it. They claim they will be able to cross the Atlantic in it at "stupendous speed."

Forsakes Northern Country

Trapper Has Lived In Sub-Arctic For Many Years

The far north country is a good place for a man with a family, who is "getting up" in years, to get out of. This at least is the opinion of T. W. "Flynn" Harris, and he should know, for he's been wandering around up there since 1881.

Trader, trapper, North West Mounted Policeman, wood-chopper and Indian Agent, for 20 years, "Flynn" has had his home in the sub-Arctic. Now he is in Edmonton, retired by the government from his position as Indian Agent, and he's going to Cold Lake to settle down.

Belgium has only 155,000 unemployed.

South Shields, England, is building 142 houses for the aged.

Investigated Northern Lights

Scientists Have Spent Fifteen Months At Fort Rae

Aurora borealis flash across the northern sky some 60 miles above the earth, according to calculations made by members of the British polar year expedition who arrived at Edmonton by aeroplane after 15 months spent at Fort Rae, North West Territories, studying weather conditions in the far north.

Five members of the party, A. Stephenson, who was formerly with the Wilkins expedition in Greenland, F. A. Shepherd, R. Morgana, W. A. Grinstead and J. Kennedy arrived in a MacKenzie Airways aeroplane piloted by Matt' Berry. Dr. J. M. Stagg, leader of the expedition, returned by river boat with the valuable instruments used in investigations.

Results of their observations will not be revealed until the voluminous data on meteorological, terrestrial magnetism, aurora and atmospheric electricity as analyzed after their return to England, the scientists stated.

"We simply made the observations and collected the data," Mr. Grimstead explained. "The results of our work will come out later."

In all, 4,000 double photographs of the northern lights were taken by means of cameras on either end of a telegraphic line placed 20 miles apart. Cameras and instruments were focused on a star and the photographs taken instantaneously. Thus by means of triangulation the distance and action of the northern lights could be estimated.

A Rare Spectacle

Aunt Of Cavalry Subaltern Liked Field Of Polo

The young cavalry subaltern was showing an elderly aunt round the barracks. The old lady became confused by many references to military technicalities, but she gamely determined to appear to take an appreciative interest in everything shown to her. "And that," said the sub, pointing to the distant landscape, "is our polo field." "Ah, yes," said the old lady, peering through her glasses, "I often think there's no more beautiful sight than a field of waving polo."

Sporting and Dramatic News, London.

CREAMED CELERY AND GREEN PEPPER

One and half cups celery (cut in one-inch pieces); 1 green pepper; 3 tablespoons butter; 3 tablespoons flour; 1/2 teaspoon salt; 1/2 teaspoon pepper; 1/2 cup evaporated milk; 1/2 cup water; 6 slices toast.

Cook celery until tender. Drain and mix with sliced green pepper. Melt butter in double boiler. Add flour and seasonings. Blend thoroughly. Add gradually evaporated milk and water, stirring constantly until mixture thickens. Cover and cook ten minutes longer in double boiler, stirring occasionally. Add celery and green pepper. Serve on toast if desired. Serves six.

A Profitable Proposition

One rural subscriber who was renewing his subscription the other day to the Pictou, Nova Scotia Advocate, pointed out that he would not miss one issue of The Advocate henceforth as a result of a recent experience. "Why," said he, "if I hadn't been getting your paper I'd have missed a sale the other day at which I made several dollars on the purchase of a cow. I made enough to pay for the paper for two or three years in the one deal."

Better Conditions Due To General Upswing

Improved Business In Canada N Credited Wholly To N.R.A.

Figures issued by the Dominion Bureau of Statistics indicate business conditions in Canada have progressively improved since March of this year, before the National Recovery Act was passed in the United States.

Although officials of the Canadian Manufacturers' Association would not express an opinion as to whether the increase in Canada's export trade as reported from the Department of National Revenue at Ottawa, was due to influence of the N.R.A., Dominion statistics indicate it was not a major influence.

Physical volume of business, industrial production, manufacturing in the Dominion, along with export trade started on an upward trend in arch, improving steadily in following months. Canada's trade "low" was reached in January-February.

Although some credit is given the National Recovery Act by manufacturers at Toronto, for improved conditions, owing to the influence of conditions in America's trade "low" is considered improvement is principally due to a general upswing in world conditions.

More Than One China

Not Counting Manchuria Writer States There Are At Least Five

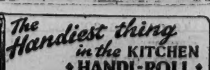

O. M. Green in an article in the Nineteenth Century and After says everyone returning from the Far East is familiar with the fatuous question, "Well, and when is China going to settle down?" The only possible answer is, "Which China do you mean?" Not counting Manchuria, there are at least five Chinas—Canton in the South, Hankin in the Centre; the North (in a generally fluid state very difficult to define); the huge western province of Szechuan and the Commanches.

A solution of bicarbonate of soda will make an excellent white ink.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl," etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some plan for the future. Mrs. Hoyt, Camilla's foster mother, suspects from Camilla's actions that a romance is brewing. She is anxious to see Camilla wed wealth.

(Now Go On With The Story)

CHAPTER X.

It was not long after Camilla knew that "Pa" Lorenz was her father that he had been killed in an accident at the foundry, thus taking him out of her life almost as soon as he had entered it. The industrial insurance had saved the family's humble home and with three-fourths of the children working all the time and living at home, Mrs. Lorenz managed a thrifty existence.

She rather gloried in her newly acquired authority and independence, only partially assumed by young Henry, who had taken his father's place in the shop. He was a sub-foreman now, and more popular than his father had been. He carried none of his antagonism and resentment of inferiority. He was the readjusted young American. The Lorenzes lived in a section built up of thrifty laboring home owners, where women who had toiled mercilessly in European fields now used electric washers and vacuum cleaners, and found time to chat over back fences and linger over delicious bits of gossip on the street to and from the market.

Their faces grew brighter and their accents less pronounced, as their dresses grew more shapely and their clothes less shabby. Patches of lawn and clipped hedges added dignity to the rows of frame houses that had been built from one blue-print, while flowers and vegetables flourished in the back yards for beauty and economy. Pungent, spicy odors were wafted from open doors and windows, to the four winds, and children laughed and cried and played ball in the streets.

Such was the environment that Camilla learned was hers by right of birth; but however hard she might try, she knew that she never could adopt it for her own again. There were times when she wished devoutly that she had not been selected from that wilderness as a rare flower, to be transplanted in the sheltered atmosphere of the conservatory. But her studies at National had dissipated that notion, and her meeting with Peter had totally dismissed it. That was why her sudden change of attitude aroused Mrs. Hoyt's curiosity as to the cause.

No opportunity to follow up her suspicions escaped her vigilant eye. She went into Camilla's rooms often after dinner, especially if Camilla were dressing to go out anywhere

Such circumstances inspire women's confidences. She displayed a growing interest in seeing that Camilla looked just right.

"You seem to be happier of late," she suggested pleasantly, one evening.

"Am I?" asked Camilla. "Yes, perhaps I am. School will be out soon."

"Are you so tired of studying?" hopefully.

"Oh, no. Just anxious for September and the beginning of real work," she replied easily, letting a cloud of rose-tinted suede lace fall over her head and shimmer into folds around her mesh-clad ankles.

For one thing, Camilla rejoiced in spite of her resentment over her false position as Camilla Hoyt—that her wealth provided her with beautiful clothes just now when she wished to appear her loveliest in Peter's eyes. Of course, he would love her just the same if she wore rags—or a shawl—she told herself. Every woman believes in that supposition, but she never dares to put it to the test. A misplaced lock of hair, a shiny nose, an unbecoming gown—she lives in a continual dread of her lover's discovery of these mars to whatever beauty is hers.

"May I ask where you are going this evening?" Mrs. Hoyt continued casually.

"The art school classes are having a dance in the auditorium."

"Oh! Is someone taking you?"

"One of the students," Camilla replied easily, but her heart beat furiously at the mere thought of Peter.

"Do I know him?" Family introductions and long acquaintances were of paramount importance in Mrs. Hoyt's social world.

"I don't think so. His name is Anson—a senior."

"Queer name, it sounds—Swedish."

"Is it? I suppose it is. All I know is that he is one of the honor students."

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted."

"I was heart sick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

MRS. J.F.T., Montreal.

of character, history, ancestry, social status and financial rating.

Peter was modest. "That may be, but Miss Hoyt only tells nice things about everyone."

"Oh, have you known her for long?"

"Only since I went into Professor Drake's class as a critic."

"A critic?"

"Yes, I had taken his work two years ago. I wanted to find out if I had improved any," his smile was charming, and included Camilla.

She moved toward the hall anxious to escape the rest of the list of questions. "We are late, now, Mr. Anson. I think we had better be going."

Mrs. Hoyt followed them to the door. "Your car—where is it?"

She exclaimed with alarm, as if she thought it must have been stolen, when she saw none waiting outside.

"We're walking. It's only across the park," said Camilla, "and Mr. Anson lives near. I insisted that he shouldn't bring a car."

"That's ridiculous, Camilla." She turned to Peter. "You must not humor her queer notions, Mr. Anson."

"I like the walk myself," Peter defended her, bowing a courteous good-

"We're walking—it's only across the park."

"Is his family—er—prominent?"

Camilla knew that was the next item on the questionnaire.

"You mean, has he money? I don't know. It makes no difference whether he has or not, at a school dance. Class dues pay the expenses." She knew what Amelia Hoyt implied, but she maintained a guileless innocence.

Mrs. Hoyt changed her attack. "From the way you are dressing, I thought you were going somewhere important. That is a new frock."

"Yes, do you mind my wearing it?" sweetly.

"No, indeed. You look very lovely, my dear," she assured her hastily. "I should like to meet your friend when he calls for you."

Camilla thought, "She will have to meet him sometime. I can't see him all summer and prevent it. She might even like Peter. I don't see how she could help herself." Aloud, she replied, "If you wish."

Peter looked his best in evening clothes, as all handsome men do, and all plain men do not. Camilla was delighted that Mrs. Hoyt seemed to be impressed favorably with him. Of course, her attitude could make little difference in their lives. So far as Camilla was concerned, Mrs. Hoyt had nothing to do with their future. Her own plans had provided for that. Only her approval of Peter would make the summer less difficult when she discovered that Camilla was seeing him often. She would dominate Camilla until the day she left her house, however, independent she might try to be.

Camilla tells me you are one of the best students at National." Mrs. Hoyt began in the subtle manner which Camilla had learned was the first item in the long questionnaire

night. "I promise not to keep her out late, Mrs. Hoyt."

"That was sweetest of you to let me out about that car," he told Camilla, taking her hand possessively and drawing it through his arm as they walked along the gravel path beside the lagoon. "But that's just it, Camilla. Always you will have to apologize for me and defend me."

"Peter! Not always!" she reproached him, stopping suddenly in the path to emphasize her words. "Some day I shall be so proud of you that I shall have to protect you from the admiring throngs."

"But that is so far away, dear. The apologies will come first. I'm just afraid that you will get weary of the prologue and won't want to go on with the story—if there is one."

"Is that all the faith you have in me, Peter?" she asked sadly.

He was instantly contrite. "Forgive me, darling. I do believe in you, but sometimes I don't dare to trust myself. You are so wonderful, I can't believe it's all true—your loving me like this, you know."

Making Liners Cooler

Canard Company Finds White Paint Reduces Temperature Many Degrees

The Canard Line has announced that the "Mauretania" had been so well received as an all-white cruising liner that they have decided to paint the liner "Franconia" white before the beginning of her world cruise next January.

H. P. Borer, general passenger manager of the line, said that engineers of the "Mauretania" had reported to him on a series of scientific observations taken on the "Mauretania" during cruises to the West Indies. They took similar readings last year on identical cruises and have reported that the liner is from seven to nine degrees cooler in her white dress.

"I didn't believe it at first," Mr. Borer said, "and thought it as just a stunt. But they produced the figures and scientific data to show that a white ship must be cooler than black one. So I capitulated."

The "Mauretania," still one of the swiftest liners afloat despite her age of more than a quarter of a century, has proved popular in the cruises trade. On September 27 the ship will be sent to England for a month for reconditioning. In November the liner will be back again for a series of cruises to last until April.

THE RHYMING OPTIMIST

By Aline Michaelis

THE FADED TAPESTRY

Her life is like a faded tapestry Whose colors have grown paler with the years;

Of every one-time vivid flower and tree

The shadow only, dim and vague, appears.

Day after day has shed its rays thereon

And the carresses of those golden beams

A part of sapphire, rose and jade have won;

The picture now as pale as moonlight gleams.

A faded tapestry, which takes from time

And added beauty as the seasons go;

So softened, rendered mystic and sublime

With lovelessness no crude, new thing can show.

We see her life grown fairer at the end

Which glamour, years, and years alone, can lend.

Some Cures For Insomnia

Plenty Of Recipes Given From Which To Choose

Sleepless nights? Try these favorite recipes from all over the world for winning the favors of Morpheus:

Count the number of people you know.

Plug your ears with cotton.

Recite Keats' "Ode to Sleep."

Read the Bible.

Try to recall a previous dream and "think" yourself back into it.

Double figures—twice one, twice two, twice three, and so on. If sleep does not come, you are said to find it easy to reach 16,777,216 when the combinations of seven lulls the brain.

Play an imaginary game of golf or billiards.

Place a pad of lint or rag, wrung out in cold water, on the pulse of the left wrist, then bind it with a handkerchief.

Munch a hard crust.

And sleep with the head to the north, "in line with the earth's magnetic currents."

Has Slim Chance Now

If Motor Cars Speeded Up Pedestrian Will Have Hard Time

The pedestrian has a hard enough time as it is; he must hop quickly with a car coming dead at him at 40 miles per hour. If the speed of the cars were stepped up to 125 miles per hour he would have no chance whatever.

If he stood still he would be struck so hard that identification would be difficult; if he jumped with sufficient agility to escape he would have to strain his back and injure his arches for life. The extent of the jump which he makes today would be a futile gesture. The leap which would deliver him from a car speeding at 40 miles per hour would be of no use whatever when pitted as a safety measure against one speeding 125 miles an hour.

Won His Bet

The people who work on one of the tobacco farms in Ontario got a surprise by seeing a young man drink five pounds of extracted honey in 4 minutes. He won the bet; the bet being if he drank the five pounds in 5 minutes, the owner was to give him 25 pounds. If the young gentleman had not been drinking the honey in the time set he was to pay for the five pounds.

Longest Lived Trees

Older than the pyramids or sphinx of Egypt—Older than the first city built by Cain—Many of the "Big Trees" of California may have been seedlings when Adam walked the earth. English Oaks are also noted for their long life—trees are now standing which were large enough to cut for lumber when the mailed Knights of William the Conqueror landed in the year 1066.

EVEREADY LONGEST LIVED RADIO BATTERIES

It's long life that saves money on battery upkeep. You get longer life from Layerbilt Batteries because they are crammed full of power-producing material. No waste space in the flat layers. Every inch works for you. If buying a new set, ask about the new Air-Cell radios which are specially designed for homes without electricity. No recharging necessary with Eveready Air-Cell "A" Batteries

Biologists Discover New Growth-Promoting Acid

"Fahthothenic" Is Name Given Most Universal Stimulant Ever Found

An article by Howard W. Blakeslee, AP Science Editor, says the most universal stimulant ever found, a growth-promoting acid, was under discussion by American Chemical Society Biologists. Even its name, "fahthothenic acid," was new to most of them. Its discovery was reported by Dr. Roger J. Williams and Carl M. Lyman, of Oregon Agricultural College, who said they named it from the Greek meaning "from everywhere," because that described exactly where they found it.

"It was a 'constituent of all living things.' They found it in humans, worms, plant molds, oysters, bacteria, algae and milk. 'It is probably safe to say,' they stated, 'that it is more widely distributed in nature than any known physiologically potent substance. It is apparently a single acid substance.'"

"Although they have not yet succeeded in getting rid of all the impurities, their last extract, taken from liver, is so potent that a single drop of a solution of a pin head speeds up the growth of yeast in 250 gallons of liquid."

Their experiments indicate that it is composed of long chains of carbon, hydrogen and oxygen. Neither sulphur nor nitrogen has been found in it, or any of the common combinations of carbon and hydrogen forming sugar. In strength it falls between acetic and lactic acid. Yet one part in a billion appears sufficient to affect growth.

This indicates, they stated that it probably is a catalyst, one of those minute chemical substances whose presence causes great chemical changes without the catalyst being affected in the slightest.

Good Motto To Adopt

Eastern Truck Company Forbids Employees To Hog Road

Printed on one large transport in Eastern Canada are words: "Our motto is courtesy. If this truck hogs the road, notify this company." Many people wish that every transport and bus company would not only adopt but practice this motto. The way many of the drivers of large transports and busses hog the centre of the road is dangerous to general traffic and those in authority should make an example of some of them in an endeavour to show that the business or pleasure car has some rights on our highways.

New Fire Escape

A new life-saving device which can be attached to any window, has been invented in Germany and was tested recently in Berlin. Two ropes are thrown to the ground, where passers-by catch them and control the descent of the escaping person. In the test a man and a girl descended from a skyscraper.

Flamingoes in North Africa are building nests, some of which are conical structures rising two feet above the water level.

More than 30 per cent. of the people now in insurable employment in Britain are women.

Little Helps For This Week

"If we love one another God dwelleth in us, and His love is perfected in us."—1 John 4:12.

"And he that keepeth His commandments dwelleth in Him, and He in him. And hereby we know He abideth in us by the Spirit He hath given us."—1 John 3:24.

Abide in me; o'ershadow by Thy love. Each half-formed purpose and dark thought of sin; Quench ere it rise each selfish, low desire, And keep my soul as Thine, calm and divine.

The spirit of love must speak the words and work the works of love. It cannot exist and give no sign, or a false sign. It cannot be a spirit of love, and mantle into irritability and selfish impatience. It cannot be a spirit of love, and at the same time make self the prominent object. It cannot rejoice to lend itself to the happiness of others and at the same time be seeking its own. It cannot be generous, and envious. It cannot be sympathizing, and uncremely, self-forgetful and vain-glorious. It cannot delight in the rectitude and purity of other hearts, and yet unnecessarily suspect them.—J. H. Thom.

Changed Into Land Animals

Royal College Of Surgeons Experimented With Mexican Fish

Fish have been changed into land animals by members of the Royal College of Surgeons, in London, England.

The fish selected for the experiment were Mexican salamanders, which normally spend their lives in water.

They were fed with thyroid gland and a month later the gills and tailfin had completely disappeared, eyelids developed—and the salamanders struggled from their tank on to the shore.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Your digestion. Bowel elimination. Poisons in the body. General weakness.

How can you expect to clear up a situation like this completely with more low-downing salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely for them by name. Refuse substitutes. 25c, all druggists.

MINARD'S LINIMENT
"KING OF PAIN"

Main Street

Dr. Richardson, of Viking, has taken over the dental practice at Irma of Dr. Murray and will from now on visit Irma every Friday where he will continue to work in the rear of the Drug Store.

The next meeting of the Ladies' Aid will be held at the home of Mrs. Tripp on Thursday, October 12th.

Messrs. Donald and Denzil Skiles, who have been visiting for some time with Mr. and Mrs. Skiles, left Tuesday night for Winnipeg and Chicago.

Mrs. Ben Sather gave a birthday dinner in honor of Mr. Jim Pond, on Sunday last. A number of guests were present and all reported a good time.

Miss Sals Horn, of Battle Bend, is visiting in Irma with her aunt, Mrs. R. C. McFarland.

Ray Locke is seen going south on Main street quite frequently. But then, we understand—Ray meets the train to get his papers.

We regret very much to see Johnny Schomert going around looking so solum these days. Never mind, Johnny; it will all come out in the wash.

Miss Helen Knudson left Sunday for Camrose where she will attend the Lutheran college for the coming year.

Miss Ethel Milburn left on Tuesday night for Toronto where she will spend the winter with Mr. and Mrs. Milburn, her aunt and uncle.

Mr. Jas. Woods has purchased 1-4 acre of land from Mr. L. A. Schon. This piece of land formerly belonged to Mrs. S. Matheson and is situated between Mr. Schon's one-acre parcel and the King property.

On account of the small number of young people present last Sunday eve, it was decided to have another meeting next Sunday at the close of the evening service to decide whether or not to organize a Young Peoples' society for the coming winter. A special invitation is extended to all interested parties to attend.

Several boys and girls under school age are in the habit of playing in the school barn while it is full of horses. This is a very dangerous practice and parents should see to it that their children keep away from the barn, especially on school days.

The C.N.R. are again putting on a special rate of one cent per mile for return tickets from Irma to Edmonton, leaving Irma 4.55 p.m. October 12th, and returning not later than 7 a.m., October 14th. This will enable anyone to buy a return ticket at Irma for \$2.20 and have two evenings and one full day in Edmonton. This is certainly a worth-while saving.

Lloyd and Phyllis Erickson, also Sigurd Fluvog and Helen Knudson are attending the Camrose Lutheran college this fall and winter.

Mr. Olaf Larson is attending the University of Alberta.

Mr. Abel Oldham arrived in Irma from Ontario on Tuesday morning for a visit with his brother and family and old friends.

A house full of the Peterson kith and kin gathered at the home of Mr. and Mrs. Frank Peterson on Sunday, October 1st, to celebrate Mrs. Peterson's 77th birthday. The Times joins with others in wishing Mrs. Peterson many happy returns of the day.

The committee in charge of the Irma skating rink will be glad to receive help from anyone to finish levelling the ground and erect a fence as soon as threshing is completed. Anyone who can help either single-handed or with teams please notify Jack Fletcher so this work will go ahead without any delay.

Please keep in mind the hockey club dance on the 13th in Kiefer's hall. Proceeds will go towards buying lumber and other material for the new rink.

Mrs. C. W. Milburn, of Toronto, who has been visiting in the West during the past summer, left on the Flyer Tuesday evening for her home. Her niece, Miss Ethel Milburn, accompanied her to Toronto.

Mr. Louis Popp has been sick since last Sunday, being threatened with appendicitis.

TO WHOM IT MAY CONCERN:

I understand there is a rumor afloat to the effect that recently I butchered a cow which had a small lump on its face (which is true). However, the rumor goes on to state that the meat would be unfit for human consumption which is absolutely untrue. In my three years' apprenticeship to the trade I was taught every detail of the business, including diseases, how to detect same and how it should be dealt with in all its different stages that would make meat unfit for human consumption. I have dealt with many cases, both for myself and others who have done their own killing in my past 27 years' constant experience as a butcher. The public can be well assured that any meat they get over my block has always been and will be free from any injurious disease.

A. E. FOXWELL.

ANGELICAN CHURCH NOTES

The Rev. Wilson, of Edmonton, will be the special preacher for the Harvest Thanksgiving service to be held in the United Church at 3 p.m., October 8th.

The W.A. will meet at the home of Mrs. Pryce Jones on the 3rd Tuesday of the month, October 17th.

Viking Items

Albert Emery, of Red Deer, is paying a visit to relatives and friends in this district.

Allan Barker underwent a successful operation for appendicitis at the local hospital on Monday and is reported as doing well.

W. J. Brown reports the sale of a Hart-Parr tractor to A. A. Burnham last week.

Clarence Crowther is a visitor in town this week.

The postoffice furniture and fixtures were moved into the new building on Main street over the week-end and the premises were open to the public at the usual hour on Monday morning. The new building is well lighted, airy and commodious and is a real asset to the town and district. The front of the building is yet to be succeeded which will give a very fine outward appearance indeed.

J. L. Dods left Monday evening on a visit to relatives and friends in Ontario. Mr. Dods will also take in the world's fair at Chicago before returning home.

Col. J. N. Rohrer is auctioneer for a sale to be held on the Sam Murray farm, 4 miles north of Jarrow on Tuesday, October 17th. See posters for further particulars.

The L.D.R. society are holding a waffle supper on Saturday, October 20th. Please keep this date open.

Mrs. E. M. Hilliker, Miss Mary Hilliker and Ken motored to Edmonton on Monday for a short stay.

Miss Muriel Wittmann, of Wainwright, was a guest of friends here over the week-end.

Wm. F. Hill, provincial compensation board officer, was in town on Monday, on his annual inspection tour.

Rev. and Mrs. J. W. Bainbridge and little daughters, Ruth and Doris, returned on Friday evening from a five months visit abroad, most of which time was spent at Rev. Bainbridge's

home in Carlyle, England. They stopped off in New Brunswick and Toronto enroute home. Mr. Bainbridge expressed himself as being glad to be home, although the whole journey was very pleasant for all the members of the family.

Laurie Scott, manager of the Evelich, Minnesota, professional hockey team, that won the championship series with Minneapolis last year, was in town on Saturday, renewing acquaintances and looking after his farming interests east of town. He is leaving for the northern Minnesota mining town early next week to again take up the managerial reins. Laurie told us he still takes his place on the team when occasion demands.

Mr. J. L. Pierre, of Edmonton is relief agent at the C.N.R. station while Mr. J. L. Dods is on a holiday, taking in the Chicago world's fair.

Archie Cartwright is spending a few days with relatives at Chauvin.

The Road to RECOVERY

A Statement by the Prime Minister of Canada

WITHIN a few days the Dominion of Canada will offer for public subscription the 1933 Refunding Loan, the purposes and terms of which will be announced in detail by the Minister of Finance on Tuesday, October 10. In this national undertaking an opportunity will be afforded both for sound investment and for public service, and I have no doubts as to the readiness with which Canadian investors will respond.

I feel, however, that the 1933 Loan marks a point in Canadian affairs to which it is only proper that public attention should be drawn as a means of extending justifiable encouragement to many thousands of men and women who have endured adversity with such admirable fortitude.

With due precaution against unwarranted optimism I think I may say that in Canada we are now on the road to recovery. The road may be long and progress may be slow, but the events of the past six months appear to demonstrate with increasing clarity that the downward trend has come to a definite stop and that an upward trend is now in progress.

The evidence of improvement is written in the statistical facts of our industry and trade. These records show that our general economic condition reached its lowest point during the month of February last and that today we are definitely above that level following a recovery which has been gradual but persistent and unmistakable.

The most significant of these figures are probably those dealing with the physical volume of business, wholesale prices and employment, and I give here briefly the record of recovery in each case as shown by the reports of the Dominion Bureau of Statistics.

The index of our physical volume of business, which represents virtually the economic pulse of the nation, stood last February at 67.1. For August, the most recent month for which the index is available, the figure was 89.9, an improvement of approximately 34%.

Wholesale prices, in which even minor changes are highly significant, have risen over 9%, or from an index of 63.6 last February to one of 69.4 in August.

Employment, although still at a regrettably low level, has, nevertheless, been gaining steadily for the past five months. On the basis of partial reports from industrial employers some 116,000 persons have been added to pay-rolls since last April. An estimate by the Bureau on a more comprehensive basis places the total increase in employment at 246,000 during the same period.

Our external trade figures are equally encouraging. Both exports and imports have risen, with the former showing the more rapid increase. As a result, Canada had a favourable trade balance of over \$114,000,000 in the twelve months ended August 31st this year. For the corresponding period last year the favourable balance was only \$38,000,000, and in the two previous twelve months' periods instead of favourable figures we had unfavourable balances of \$45,000,000 and of \$103,000,000 respectively.

All these facts and figures I think we may quite safely take as sign-posts on the road to recovery. In our further progress, no single factor will have more significance than the success of our national loan operations. The recent 4% loan in London was a notable tribute to Canada's credit standing. It was immediately oversubscribed many times and now commands a substantial premium. I feel satisfied that our own people will be quick to perceive that the 1933 Refunding Loan in Canada is at once a challenge and an opportunity—a challenge to aid in the restoration of business recovery and an opportunity to serve thereby their own and their country's best interests.

P. B. Bennett

PRIME MINISTER OF CANADA

DOMINION OF CANADA 1933 REFUNDING LOAN
